

VELOCITY LATIN AMERICA

DO YOU HAVE CONTENT THAT NEEDS TO BE DELIVERED TO LATIN AMERICA?

VELOCITY LA+2 is the answer. This new service from Microspace Communications is much like our domestic service, it uses small receive site antennas and inexpensive satellite receivers.

Video, audio or data are economically and securely delivered to a huge Latin America footprint on the new SATMEX 8 satellite located at 116.8 degrees West.

Choose a satellite channel of any bandwidth. . . fulltime or occasional use. . . your choice!

Microspace makes it easy with the new VELOCITY LA +2 service. We provide the uplinking, satellite bandwidth and network monitoring. All from a company that's been providing reliable, cost effective satellite solutions for over 25 years.

LET US SHOW HOW EASY IT IS!
