

Enterprise Video Production

MICROSPACE
We Connect.

Custom Solutions for Corporate Communications

Microspace Communications is a trusted provider of quality video production and transmission of video to display devices of any type.

Our headquarters and Network Control Center feature more than teleport and broadcast facilities. It offers a wide array of satellite, streaming and national fiber distribution services. Microspace also has a professional studio that's perfect for recorded or live video shots.

Affordable, Professional Studio

With our video and audio experience and capabilities you'll look and sound your best!

- Professional video and audio recording equipment
- Full screen digital backdrop
- State of the art teleprompter
- Broadcast quality video production

Our Capabilities

When you have a state of the art studio to shoot in, production and post are a breeze since the raw footage is of very high quality. Microspace can handle the finishing touches to make sure your content is looking, sounding—and streaming great.

- Liveshot Studio: Live interviews
- Satellite Media Tours: Broadcast to national and local TV networks
- LTN and The Switch Connectivity (HD-SDI)
- On-Location video production
- Videography, lighting, sound
- Video editing
- Hair and makeup available upon request
- Green room waiting area with wifi

Helping You Make the Best Video You Can

Having worked with thousands of hours of video content, Microspace can provide guidance that will ensure the best finished product possible. We can review your script and shot list, and make recommendations on how to shoot the video as well as any supporting images needed to make sure your video is produced as efficiently as possible—without compromising quality.

Reaching your employees, prospects and customers has never been easier.
