

Live Video Streaming Service

MICROSPACE
We Connect.

powered by LIVEU

Microspace Live Video Streaming solution powered by LiveU provides secure, reliable, and cost-effective streaming of your business-critical video to users around the globe. This solution is extremely scalable and can support hundreds or even thousands of unique viewers.

On average, companies in the U.S. experience network outages five times per month—that's 60 periods of downtime each year! According to a recent IHS study, outages cost more than \$700 Billion a year.

A restaurant's revenue stream, whether locally owned establishments or national chains, relies today on a whole slate of cloud-based applications. Office 365, G Suite, cloud-based inventory control and ordering, and even your online marketing. Odds are any business is going to be hampered by a broken internet connection.

That's where Microspace's CellCast 4G-LTE solution enters the picture.

Business Video Network you can depend on.

CellCast is easy to configure and install and transforms any network location into a fully managed solution that will seamlessly kick over to failover in case of an outage.

For locations with no wired internet options, CellCast can work as a primary connection to deliver high-speed 4G-LTE internet that is cost-effective and can be installed almost anywhere.

Enterprise

Communicate, collaborate, and train employees using high-quality live streaming.

Maintain business continuity through live communication with internal and external audiences and allow your executives to easily connect with networks all over the world from their corporate HQ's or in-home studios.

- **Transmit broadcast-quality, reliable live video over IP/5G**
- **Manage live production remotely from your studio or in the cloud.**
- **Ensure optimal IP connectivity wherever you are**
- **LiveU equipment and video transmit all from one provider.**

Government

Get your message out reliably and in real-time

Microspace and LiveU reliable and secure live transmission solutions allow government organizations and other officials to get their message out reliably and in real time for any situation they may encounter. Public information, special events, and community outreach can be disseminated using live video and in the highest possible quality.

Public Safety

Securely deliver high-quality live video from anywhere

Designed for mobile use, Microspace and LiveU portable and lightweight solutions allow public safety organizations to gain real-time location-independent connectivity. Leveraging LiveU's unique IP bonding technology, and Microspace Network Operations Center you will be able to reliably transmit live video from any location on the ground, water, or in the air back to your command centers.

Let us transmit your live video over satellite to locations and networks across the country.

Oil & Gas

Microspace and LiveU provide Energy companies with Real-Time live video and Two-Way communication that allows reporting on efforts when dealing with disruption due to weather events or other catastrophes. It also helps improve efficiency and collaboration which result in fewer project delays and saves money for the corporation.
