

Cellcast Managed Failover Internet

CellCast
powered by MICROSPACE

Microspace: The Difference

Some of the main differences between CellCast and other failover solutions include:

- Superior network management
- Award-winning 24/7 white glove support
- Real-time status and health reporting
- A state-of-the-art Network Operations Center to provide support
- Available month-to-month plans for temporary connectivity

These services among others give Microspace the ability to react quickly and effectively to keep your office connected.

Beyond router and network status, each device can also be remotely accessed for security and firmware updates—keeping your network up to date and secure.

CellCast is also an ideal solution to delayed network installations or service issues. In emergency situations, routers can even be deployed overnight.
